Manual

MODEL: SAFETY FIX 3 PRO i-Size / SAFETY FIX 3 CLASSIC i-Size
ECE R129.04 v.1.1

Notice! The product graphic serves only as an example!

1.0 Application

The car seat has been designed, tested and approved in accordance with the requirements of UNECE Regulation No. 129 concerning the approval of improved child restraint systems (UNECE R129/04).

The child car seat is intended for children with a height between **76 cm and 150 cm**, and is designed for **forward-facing installation**.

The seat may be installed only in the vehicle seating positions specified by the vehicle manufacturer in the vehicle user manual. Always read the vehicle manufacturer's instructions carefully before installation.

Child's height	Seat orientation	Seat affixing	Strapping the child
76 cm – 105 cm / ≤18kg		ISOFIX + TOP TETHER  ISOFIX 	Internal harness 
100 cm – 150 cm		ISOFIX + 3-point vehicle seat belt  ISOFIX 	3-point vehicle seat belt 
100 cm – 150 cm		3-point vehicle seat belt 	3-point vehicle seat belt 

2.0 Safety instructions

Please take a few minutes to read this manual to ensure proper safety for your child.

- DO NOT affix the car seat on rear facing or side facing vehicle seats.

- The seat can be installed only if there are 3-point seat belts on this seat.
- If a car seat is installed in the front seat, turn off the front air bag.

- It is recommended to install the car seat only on the rear seats of the vehicle.

WARNINGS!

Please take a few minutes to read this manual to ensure proper safety for your child. Many easily avoidable injuries are caused by careless and improper use of the seat.

! The car seat is intended for installation only on vehicle seats facing forward.

It must not be installed on vehicle seats/benches facing rearward or sideways relative to the direction of travel.

! If the car seat is installed on the front seat, the front airbag must be deactivated. It is recommended to install the seat only on the rear seats of the vehicle. Information regarding the suitability of a vehicle seat for use with a child seat can be found in the vehicle user manual.

! Ensure that the internal harness securing the child is properly adjusted to the child's body and is not twisted. For this reason, the child should not wear thick clothing under the harness.

! The lap belts must run as low as possible across the child's pelvis to ensure optimal protection in the event of an accident.

! The car seat must not be used without the cover.

! It is recommended to keep this instruction manual for the entire period of use of the seat.

! Do not use replacement covers other than those recommended by the manufacturer, as they are an integral part of the seat's safety system.

! Do not use any attachment points other than those described in the manual and marked on the seat.

! DO NOT use any other attachment points than those described in the instruction manual and marked on the car seat.

! All rigid elements and plastic parts of the child seat must be positioned and installed so that, under normal vehicle operating conditions, they cannot become trapped by a moving seat or a vehicle door.

! Regularly check the technical condition of the seat, paying particular attention to attachment points, seams, and adjustment elements.

Ensure that all mechanical components are fully functional. Never lubricate or oil any parts of the child seat.

! Discontinue use of the seat if any parts are damaged or have become loose.

! The car seat must be replaced if it has been subjected to violent loads during a road accident.

! No modifications may be made to the car seat without approval from the appropriate homologation authority. Failure to install the seat in accordance with the manufacturer's instructions may endanger life and health.

! Protect the child seat from direct sunlight, as heated components may cause burns to your child. Protect both the child and the seat from sunlight.

! Never leave your child unattended in the seat.

! Ensure that luggage and other items are properly secured, especially on the rear shelf, as they may cause injury in the event of a collision.

! In the event of an emergency, it is important to quickly release the safety harness. This means that the harness release button is not fully secured—ensure that your child does not play with the harness.

! Set a good example for your child and always fasten your seat belt. An unbelted adult can also pose a danger to the child.

! Before every journey, make sure the car seat is correctly installed.

! The car seat must be secured even when not in use. An unsecured seat can cause injury to passengers even during sudden braking.

! In some vehicles with delicate upholstery, the use of child seats may leave marks and/or cause discoloration. To prevent this, a blanket, towel, or similar item can be placed under the car seat.

3.0 Securing the Child and Adjusting the Backrest

The backrest of the seat is adjustable, allowing for a perfect fit to the angle of the vehicle seat.

It is important that the child seat rests firmly against the vehicle seat backrest.

Tilt the backrest backward until it is fully aligned with the vehicle seat.

IMPORTANT! For your child's comfort, move the front seat as far forward as possible to provide legroom.

3.1 Headrest Height Adjustment

1. Hold the height adjustment lever located at the back of the headrest and gently pull it upward.
2. Adjust the headrest to the desired position. When the correct height is reached, release the lever.

IMPORTANT! Ensure the headrest is locked in place.

The headrest should fit snugly against the child's head, with the lower edge of the headrest at shoulder height.

The shoulder harness height should be adjusted so that the straps enter the backrest flat and horizontally just above the child's shoulders.

3.2 Securing the Child with Internal Harness Straps

1. Press the harness adjustment button while pulling on the straps. Do not pull on the shoulder pads.
2. Unbuckle the harness.
3. Place the internal straps to the sides of the seat.
4. Place the child in the seat.

5. Adjust the headrest according to the child's height.
6. Buckle the harness.
7. Tighten the internal harness by pulling the adjustment strap until it fits snugly against the child.

3.3 Tightening the Internal Harness

1. Remove slack from the lap section of the harness by pulling it upward through the shoulder section.
2. Pull the adjustment strap until the harness lies flat and tight against the child's body.

IMPORTANT! Make sure the harness straps are not twisted.

The harness should be tight enough so that there is no more than 1 cm of slack between the harness and the child.

3.4 Using the Insert Cushion

The insert cushion increases comfort and provides additional support for smaller children.

It is recommended to use the insert until the child requires more space in the seat.

Installing the insert:

1. Press the harness adjustment button and pull the straps simultaneously. Do not pull on the shoulder pads.
2. Unbuckle the harness.
3. Place the straps to the sides of the seat.
4. Insert the inner cushion into the seat.

3.5 Stowing the Internal Harness.

1. Remove the shoulder strap pads following the steps in section 5.0 – Removing the cover.
2. Remove the crotch buckle cover.
3. Pull the seat cover slightly forward and feed the crotch buckle underneath.
4. Place the crotch buckle into its designated storage compartment in the seat base.
5. Pull the seat cover back over the cushion.
6. Unfasten the cover snaps.

7. Lay the shoulder straps along the backrest.
8. Place the shoulder buckle components into the designated compartment.
9. Refasten the cover snaps.

4.0 Installing the Car Seat

WARNING! The seat must be placed directly on the vehicle seat.

4.1 ISOFIX Installation

1. Place the Top Tether strap over the headrest, ensuring access later during installation.
2. Press the ISOFIX release levers on both sides and extend the ISOFIX arms to their maximum length.
3. Hold the seat with both hands and push the connectors into the ISOFIX anchors in the vehicle seat. Once you hear a “click” from each ISOFIX connector, push the seat firmly toward the backrest, applying even pressure on both sides.

Listen for the clicking sound as the ISOFIX connectors engage. Check the seat by pulling it gently to ensure it is secure and stable.

If the seat moves or the connectors slide out, repeat the steps above.

WARNING! The locking connectors are properly engaged only when both indicators are fully green.

4.2 Installing the Top Tether

1. Place the Top Tether over the headrest to ensure later access.
2. Press the release button on the strap buckle to extend it (the length must allow the hook to reach the anchorage point behind the vehicle seat or in the trunk).
3. Hook the Top Tether to the designated anchorage point (refer to the vehicle manual).
4. Pull the free end of the strap to remove slack. When properly tensioned, the indicator on the buckle will show green.

IMPORTANT:

The Top Tether strap must not pass over the vehicle headrest. It should be routed under the headrest.

If this is not possible, remove the headrest (check in the vehicle manual if this is permitted).

4.3 Children 76–105 cm – ISOFIX and Top Tether Installation

1. Place the Top Tether strap over the headrest to keep access clear.
2. Install the seat using the ISOFIX connectors.
3. Push the seat firmly against the backrest — installation indicators must turn green.
4. Place the child in the seat.

5. Adjust the headrest to the child's height.
6. Secure the child using the internal harness.
7. Attach the Top Tether.
8. Pull the free end of the strap until the indicator turns green.

4.4 Children 100–150 cm – ISOFIX and Vehicle 3-Point Seat Belt

1. Store the 5-point harness as described in section 3.5.
2. Install the seat on the vehicle seat using ISOFIX connectors.
3. Push the seat firmly against the backrest and ensure indicators turn green.
4. Place the child in the seat.

5. Adjust the headrest to the child's height.
6. Route the shoulder belt through the green shoulder belt guide.
7. Route the lap belt through both lap belt guides and buckle the seat belt. You will hear a characteristic "click".

4.5 Children 100–150 cm – Vehicle 3-Point Seat Belt Only

1. Store the 5-point harness as described in section 3.5.
2. Place the seat directly on the vehicle seat.
3. Push it firmly against the backrest.
4. Place the child in the seat.

5. Adjust the headrest to the child's height.
6. Route the shoulder part of the vehicle seat belt through the green shoulder belt guide on the headrest.
7. Route the lap part of the vehicle seat belt through both lap belt guides and buckle the belt — you will hear a “click”.

5.0 Removing the Seat Cover

1. Lift the headrest.
2. Unfasten the snaps on the back of the headrest.
3. Remove the headrest cover.
4. Unfasten the snaps on the inner part of the seat.
5. Loosen the harness completely.
6. Push the backrest backward to unlock it — you will hear a click. Lay the backrest flat.

7. Detach the elastic loops of the cover at the bottom of the backrest by pulling them toward the seat base.
8. Unfasten the outer clips on the backrest.
9. Remove the upper part of the cover.
10. Unfasten the Velcro straps of the harness pads.

11. Slightly pull the pad straps near the pegs inward, tucking them into the backrest.
12. Remove the pad straps from the pegs.
13. Remove the crotch buckle cover.
14. Pull the seat base cover off, starting from the front.

5.1 Attaching the Seat Cover

To reinstall the cover, follow the above steps in reverse order. Ensure the cover is properly aligned with the attachment points on the seat. Start with the seat base, then the backrest, and finally the headrest.

Make sure the cover is correctly positioned over the lap belt guides.

6.0 Cleaning

WARNING! Do not use the car seat without the cover.

- The cover is removable and can be machine-washed at up to 30°C with a mild detergent.

Leave to air dry. Do not spin dry, do not tumble dry, and do not use bleach.

- Follow the washing instructions on the cover label. Washing above 30°C may cause colour fading.
- Do not spin dry or tumble dry the cover (this may cause material separation).
- Do not expose the cover to direct sunlight for long periods.
- Plastic parts may be cleaned with water and mild detergent.
- Do not use aggressive cleaning agents (such as solvents).
- The harness straps may be cleaned with a damp cloth and lukewarm water using mild detergent. Avoid excessive soaking.
