en Explanation	de Erläuterung	fr Explication	it Spiegazione	es Explicación
 Automotive bulbs of OE quality.	KFZ-Lampen in Erstausrüstungsqualität	Ampoules pour véhicules automobiles en qualité première monte.	Lampadine per autoveicoli con qualità di primo equipaggiamento.	Lámparas con calidad de primer equipo.
 Up to 3 times longer service life, up to 10% more light*, suitable as daytime driving bulb.	Bis zu 3-mal längere Lebensdauer, bis zu 10% mehr Licht*, als Tagfahrlichtlampe geeignet.	Jusqu'à une durée de vie 3 fois plus longue, jusqu'à 10% de lumière en plus*, utilisable pour l'éclairage de jour.	Durata anche triplicata, fino al 10% di luce in più*, adatta per luci diurne.	Vida útil hasta 3 veces mayor, hasta un 10% más de luz*, adecuada para circulación diurna.
 White light, similar to daylight, up to 50% greater light output*, for better and longer-distance vision and visibility.	Weißes Licht, ähnlich Tageslicht, bis zu 50% mehr Lichtausbeute*, besser und weiter sehen sowie gesehen werden.	Lumière blanche similaire à la lumière du jour, efficacité lumineuse améliorée jusqu'à 50%*, pour une meilleure distance de vision et une meilleure visibilité.	Luce bianca, simile alla luce diurna, fino al 50% di luminosità in più* per vedere ed essere visti meglio e più in profondità.	Luz blanca similar a la luz diurna, hasta 50% más en rendimiento luminoso*, ver y ser visto mejor y a mayor distancia.
 Bluish white light – xenon look for automotive bulbs.	Bläulich-weißes Licht – Xenon Look für KFZ-Lampen.	Lumière blanc-bleutée – ampoule façon xénon pour véhicules automobiles.	Lampadina per autoveicoli a luce bianco-azzurra ad effetto xeno.	Luz blanca azulada: apariencia xenón para lámparas diversas.
 Up to 90% more light*, larger and brighter light beam, white light color, increased safety in road traffic.	Bis zu 90% mehr Licht*, größerer und hellerer Lichtkegel, weiße Lichtfarbe, mehr Sicherheit im Straßenverkehr.	Jusqu'à 90% de lumière en plus*, faisceau lumineux plus grand et plus clair, couleur de lumière: blanche, pour une sécurité accrue sur la route.	Fino al 90% di luce in più*, fascio di luce più ampio e luminoso, luce bianca, maggiore sicurezza nella circolazione stradale.	Hasta un 90% más de luz*, conos de luz más grandes y claros, luz color blanca, más seguridad en la carretera.
 Up to 60% more light*, larger and brighter light beam, increased safety in road traffic, longer service life.	Bis zu 60% mehr Licht*, größerer und hellerer Lichtkegel, mehr Sicherheit im Straßenverkehr, längere Lebensdauer.	Jusqu'à 60% de lumière en plus*, faisceau lumineux plus grand et plus clair, pour une sécurité accrue sur la route, durée de vie supérieure.	Fino al 60% di luce in più*, fascio di luce più ampio e luminoso, maggiore sicurezza nella circolazione stradale, maggiore durata.	Hasta un 60% más de luz*, conos de luz más grandes y claros, más seguridad en la carretera, vida útil más larga.
 Up to 60% more light*, larger and brighter light beam, increased safety in road traffic.	Bis zu 60% mehr Licht*, größerer und hellerer Lichtkegel, mehr Sicherheit im Straßenverkehr.	Jusqu'à 60% de lumière en plus*, faisceau lumineux plus grand et plus clair, pour une sécurité accrue sur la route.	Fino al 60% di luce in più*, fascio di luce più ampio e luminoso, maggiore sicurezza nella circolazione stradale.	Hasta un 60% más de luz*, conos de luz más grandes y claros, más seguridad en la carretera.
 Up to 30% more light*, greater safety due to better road illumination.	Bis zu 30% mehr Licht*, mehr Sicherheit durch bessere Straßenbeleuchtung.	Jusqu'à 30% de lumière en plus*, sécurité accrue par un meilleur éclairage de la route.	Fino al 30% di luce in più*, maggiore sicurezza grazie ad una migliore illuminazione della strada.	Hasta un 30% más de luz*, más seguridad gracias a una mejor iluminación de la calzada.
 Turn signal indicator bulb with magic color effect – only turns orange when switched on. Ideal for clear glass headlamps.	Blinklampe mit magischem Farbeffekt – wird nur orange, wenn sie eingeschaltet ist. Ideal für Klarglas-Scheinwerfer.	Ampoule pour clignotants à effet de couleur magique, ne devient orange qu'allumée. Idéale pour les projecteurs en verre clair.	Lampadina per indicatori di direzione ad effetto cromatico – diventa arancione solo quando è accesa. Ideale per fari a vetro trasparente.	Lámpara intermitente con efecto mágico de color: sólo se vuelve naranja cuando se conecta. Ideal para faros transparentes.

* Compared to standard halogen bulbs / im Vergleich zu Standard-Halogenglühlampen / par rapport à des lampes halogènes standards / rispetto alle lampadine alogene standard / en comparación con las lámparas halógenas estándar

For the most demanding quality requirements

- Bosch vehicle bulbs comply with all European statutory regulations.
- UV Cut: Bosch headlamp bulbs are equipped with UV Cut to reduce the harmful UV component of the light and thus protect the plastic lenses in modern headlamp systems against ageing.
- Quality and environment – always guaranteed with Bosch: The materials used comply with the specified directives, in many cases exceeding the stipulated requirements. Bosch ensures that it uses only environmentally friendly, easy to dispose of packaging types.
- Tested quality: The quality of Bosch bulbs has been certified by the GTÜ and the Lichttechnische Institut at the University of Karlsruhe.
- “Best Brand 2010” in the lighting/bulbs category: Bosch was voted the best brand of 2010 in the lighting/bulbs category by readers of the car magazine “auto motor sport”.

Bosch spare bulb set: Making sure the lights never go out on the road

- Mandatory in many European countries
- The right spare bulb always within reach
- The Bosch Minibox: Small and handy, ideal for the glove compartment
- The Bosch Maxibox: Emergency spares for almost all automotive bulbs

Tips from Bosch for more light, better visibility and added safety

- Check the lighting system of your vehicle at regular intervals and frequently clean the headlamp lenses. Even slightly dirty lenses considerably reduce the light yield of the headlamps and lights.
- Headlamp bulbs in particular become very hot during operation. Even slightest traces of grease become burnt into the bulb reducing the service life and possibly cutting the light output. Never touch the glass of the bulbs, particularly in the headlamp.
- All new headlamp systems are supplied with plastic lenses. When exposed to ultraviolet rays, these plastic lenses gradually become cloudy. When buying new headlamp bulbs it is therefore important to watch out for bulbs with UV cut.
- The Bosch range includes various product lines for different applications. If you are re-equipping your vehicle, in other words changing to a different product line, it is essential to always replace both bulbs.
- Turn off light and ignition: This can prevent damage to the vehicle electrical/electronic system.
- Caution is advised: Avoid pulling off forcefully. This can result in damage to the socket and the mount.
- Headlamp check: Whenever a bulb has been changed, experts recommend checking the headlamp adjustment before operation.

Symbols for enhanced safety

You will find various symbols on our packaging, providing information on handling automotive bulbs.

Do not touch the glass with your fingers. Hold the bulb by the base.

Protect against splash water.

Turn off the vehicle lighting before changing the bulbs.

Do not use bulbs with scratched or damaged glass.

Wear appropriate eye protection when installing and removing.

Designated usage of the bulb: The bulb is for use on vehicles (6 V, 12 V).

Wear appropriate protective gloves when installing and removing.

Designated usage of the bulb: The bulb is for use on vehicles (24 V).

Attention: Hot!

The bulb is not suitable for domestic room lighting.

Only to be used in lamps with a protective cover.

Only to be installed by specialist personnel!

Für höchste Qualitätsanforderungen

- Bosch-Fahrzeuglampen erfüllen alle europäischen gesetzlichen Vorschriften.
- UV-Cut: Bosch-Hauptscheinwerferlampen sind mit UV-Cut ausgestattet, um die schädlichen UV-Anteile im Licht zu reduzieren und so die Kunststoff-Streuscheiben moderner Scheinwerfersysteme vor Alterung zu schützen.
- Qualität und Umwelt – für Bosch immer selbstverständlich: Bei den Inhaltsstoffen werden die vorgegebenen Richtlinien selbstverständlich eingehalten oder die dort gestellten Anforderungen sogar übertroffen. Bei der Verpackung achtet Bosch auf umweltgerechte, einfach zu entsorgende Verpackungsvarianten.
- Geprüfte Qualität: Die Qualität der Bosch-Glühlampen wurde von der GTÜ und dem Lichttechnischen Institut der Universität Karlsruhe bescheinigt.
- „Best Brand 2010“ in der Kategorie Beleuchtung/Glühlampen: Bosch wurde von den Lesern des Automobilmagazins „auto motor sport“ 2010 zur besten Marke in der Kategorie Beleuchtung/Glühlampen gewählt.

Bosch-Ersatzlampenbox: Damit Ihnen unterwegs kein Licht ausgeht!

- Gesetzlich vorgeschrieben in vielen europäischen Ländern
- Die passende Ersatzlampe immer griffbereit
- Die Bosch-Minibox: klein und handlich, ideal für das Handschuhfach
- Die Bosch-Maxibox: Sicherheitsreserve für fast alle Auto-Glühlampen

Tipps von Bosch für mehr Licht, mehr Sicht, mehr Sicherheit

- Überprüfen Sie die Beleuchtungseinrichtung Ihres Fahrzeuges regelmäßig und reinigen Sie öfters die Scheinwerfergläser. Auch leicht verschmutzte Gläser reduzieren die Lichtausbeute der Scheinwerfer und Leuchten stark.
- Besonders die Scheinwerferlampen entwickeln im Betrieb eine sehr hohe Temperatur. Selbst geringste Fettschichten brennen sich daher im Kolben dauerhaft ein, reduzieren die Lebensdauer und können die Lichtleistung verringern. Greifen Sie daher besonders die Scheinwerferlampen nie am Glaskolben.
- Alle neuen Scheinwerfersysteme sind mit Kunststoff-Streuscheiben ausgerüstet. Unter UV-Strahlung trüben diese Kunststoff-Streuscheiben langsam ein. Achten Sie daher beim Kauf neuer Scheinwerferlampen immer auf Lampen mit UV-Cut.
- Im Bosch-Sortiment finden Sie verschiedene Produktlinien für unterschiedliche Einsatzzwecke. Wenn Sie Ihr Fahrzeug umrüsten, d.h. die Produktlinie wechseln, müssen auf jeden Fall immer beide Lampen ausgetauscht werden.
- Ausschalten von Licht und Zündung: Schäden an der Fahrzeugelektrik/-elektronik können so vermieden werden.
- Vorsicht ist geboten: Kräftiges Ziehen vermeiden. Ein Schaden an Stecker und Halterung könnte entstehen.
- Scheinwerfer-Check: Experten empfehlen nach jedem Lampenwechsel zusätzlich zur Kontrolle der Funktion die Scheinwerfereinstellung zu überprüfen.

Symbole für mehr Sicherheit

Auf unseren Verpackungen finden Sie verschiedenen Symbole, die Ihnen Hinweise für den Umgang mit Fahrzeuglampen geben.

Glas nicht mit Fingern berühren. Lampe am Sockel greifen.

Vor Spritzwasser schützen

Vor Lampenwechsel Fahrzeug-scheinwerfer ausschalten

Keine Lampe mit zerkratzt oder beschädigtem Glaskolben verwenden

Beim Ein- und Ausbau geeigneten Augenschutz tragen

Vorgesehener Verwendungszweck der Lampe: Es handelt sich um eine Fahrzeuglampe (6 V, 12 V)

Beim Ein- und Ausbau geeignete Schutzhandschuhe tragen

Vorgesehener Verwendungszweck der Lampe: Es handelt sich um eine Fahrzeuglampe (24 V)

Achtung: heiß

Die Lampe ist zur Raumbeleuchtung im Haushalt nicht geeignet

Betrieb nur in Leuchte mit Schutzabdeckung

Einbau nur durch Fachkraft

Sternekonzept: Das Hauptmerkmal jeder Lampe gleich auf den ersten Blick

- Vérifiez régulièrement l'équipement d'éclairage de votre véhicule et nettoyez fréquemment les verres des projecteurs. Même légèrement sales, les verres réduisent fortement l'efficacité lumineuse des projecteurs et des feux.
- Les ampoules des projecteurs chauffent fortement pendant leur fonctionnement. De ce fait, les traces grasses les plus infimes s'incrusteront définitivement dans le bulbe, réduisant la durée de vie et la puissance d'éclairage. Par conséquent, ne saisissez jamais les ampoules des projecteurs par le bulbe en verre.
- Tous les nouveaux systèmes de projecteurs sont équipés de diffuseurs en matière plastique. Sous l'effet des rayons UV, ces diffuseurs en plastique deviennent progressivement troubles. Lors de l'achat de projecteurs neufs, assurez-vous par conséquent qu'ils sont UV-Cut.
- Vous trouverez dans la gamme Bosch plusieurs lignes de produits couvrant différentes applications. Si vous changez de ligne de produits sur votre véhicule, il faut toujours remplacer les deux ampoules.
- Coupure de l'éclairage et du contact: ceci peut prévenir un endommagement de l'équipement électrique ou électronique du véhicule.
- Prudence: lors du remplacement évitez de tirer trop fort pour prévenir tout risque d'endommagement du connecteur et de la fixation.
- Ne pas toucher le verre avec les doigts: le mélange de sueur et de chaleur risque de faire éclater l'ampoule. Par conséquent, ne tenir les ampoules que par le culot.
- Contrôle des projecteurs: les experts recommandent de contrôler le réglage des projecteurs et de leur fonctionnement après chaque changement d'ampoules.

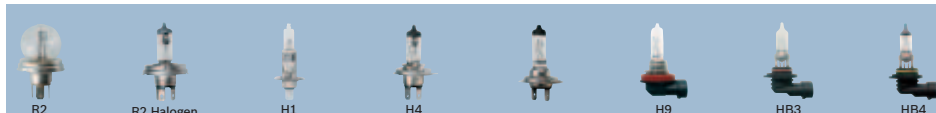

Montage uniquement par un professionnel.

Per una qualità che soddisfa anche i requisiti più severi

- Le lampadine Bosch per autoveicoli soddisfano tutte le norme legislative europee.
- UV-Cut: le lampadine Bosch per fari principali sono dotate di UV-Cut per ridurre le componenti UV dannose presenti nella luce e proteggere quindi dall'invecchiamento i vetri diffusori in materiale sintetico dei moderni gruppi ottici.
- Qualità e ambiente – per Bosch sempre perfettamente compatibili: per quanto riguarda le sostanze contenute, ovviamente le direttive vigenti in materia vengono rispettate o i relativi requisiti vengono persino superati. Per quanto riguarda la confezione, Bosch presta molta attenzione alla scelta di varianti di imballaggio ecocompatibili e facili da smaltire.
- Qualità controllata: la qualità delle lampadine Bosch è certificata dall'ente tedesco di certificazione GTÜ e dall'Istituto di Illuminotecnica dell'Università di Karlsruhe.
- «Best Brand 2010» nella categoria Illuminazione/lampadine: nel 2010 Bosch è stata eletta migliore marca nella categoria Illuminazione/lampadine dai lettori della nota rivista automobilistica tedesca «auto motor sport».

Box con lampadine di ricambio Bosch: per non rimanere mai al buio!

- Dotazione obbligatoria per legge in molti Paesi europei
- La lampadina di ricambio giusta sempre a portata di mano
- Il minibox di Bosch: piccolo, maneggevole, ideale per il cassetto portaoggetti del cruscotto
- Il maxibox di Bosch: riserva di sicurezza per quasi tutte le lampadine per auto

I consigli di Bosch: più luce, più visibilità, più sicurezza

- È opportuno controllare regolarmente l'impianto d'illuminazione del proprio veicolo e pulire i vetri dei fari. Già un leggero strato di sporco riduce notevolmente il rendimento luminoso.
- Le lampadine dei fari in particolare raggiungono temperature elevatissime durante il funzionamento. Pertanto, anche minime tracce di grasso causano danni permanenti nel bulbo riducendone la durata e il rendimento luminoso. Il bulbo delle lampadine per fari non va quindi mai toccato con le mani.
- Tutti i nuovi sistemi di fari sono dotati di vetri diffusori in plastica, i quali vengono progressivamente opacizzati dall'irradiazione UV. All'acquisto di lampadine per fari, è quindi importante accertarsi che siano provviste di filtro UV.
- L'assortimento Bosch comprende diverse linee di prodotti adatti ad impieghi differenti. Passando a un nuovo tipo di lampadina, ossia cambiando linea di prodotto, si devono sostituire sempre entrambe le lampadine.
- Disinserimento delle luci e dell'accensione: in questo modo si possono evitare danni all'impianto elettrico/elettronico del veicolo.
- Agire con cautela: evitare di tirare energicamente. In caso contrario, la spina e il supporto possono subire danni.
- Non toccare il vetro con le dita: per effetto dell'azione combinata di sudore e calore sussiste il rischio che la lampadina possa scoppiare. Per questo motivo le lampadine devono essere toccate con le dita solo in corrispondenza dello zoccolo.
- Controllo fari: gli esperti consigliano di effettuare, dopo ogni sostituzione di una lampadina, non solo il controllo del funzionamento, ma anche la regolazione dei fari.

Simboli per più sicurezza

Sulle nostre confezioni troverete diversi simboli che forniscono indicazioni importanti sulla manipolazione delle lampadine.

Non toccare il vetro con le dita.
Afferrare la lampadina dallo zoccolo.

Proteggere dagli spruzzi d'acqua.

Prima di procedere alla sostituzione della lampadina, spegnere le luci del veicolo.

Non utilizzare la lampada se il bulbo di vetro è graffiato o danneggiato.

Durante le operazioni di montaggio e smontaggio indossare idonei occhiali protettivi.

Impiego previsto della lampadina:
si tratta di una lampadina per auto
(6 V, 12 V).

Durante le operazioni di montaggio e smontaggio indossare idonei guanti protettivi.

Impiego previsto della lampadina:
si tratta di una lampadina per auto
(24 V).

Attenzione: temperature elevate.

La lampadina non è idonea per l'illuminazione di ambienti domestici.

Impiego solo all'interno di luci dotate di copertura protettiva.

Montaggio solo da parte di personale qualificato.

Classificazione a stelle: le caratteristiche di ogni lampadina in evidenza

Para los más altos requerimientos de calidad

- ▶ Las lámparas de Bosch cumplen todas las disposiciones legales europeas.
- ▶ UV cut: Los faros principales de Bosch están equipados con UV cut para reducir la parte UVA nociva de la luz y proteger así los cristales de dispersión de plástico de los sistemas de faros modernos contra el envejecimiento.
- ▶ Calidad y medio ambiente – para Bosch algo que siempre se sobreentiende: Naturalmente se respetan las normas prescritas para las diferentes sustancias utilizadas, o incluso se superan los requisitos establecidos en ellas. Bosch utiliza siempre embalajes respetuosos con el medio ambiente y de fácil eliminación.
- ▶ Calidad probada: La calidad de las lámparas de Bosch ha sido certificada por la GTÜ (Sociedad de Supervisión Técnica, Alemania) y por el Instituto de la Tecnología de la Luz de la Universidad de Karlsruhe.
- ▶ «Best Brand 2010» en la categoría Iluminación/Lámparas: Bosch fue elegida por los lectores de la revista de automóviles «auto motor sport» en 2010 como la mejor marca en la categoría Iluminación/Lámparas.

**Estuche de lámparas de repuesto de Bosch:
¡Para que no le falte luz en el camino!**

- ▶ Prescrito por ley en muchos países europeos
- ▶ La lámpara de repuesto adecuada, siempre a mano
- ▶ El miniestuche de Bosch: pequeño y práctico, ideal para la guantera
- ▶ El maxiestuche de Bosch: reserva de seguridad para casi todas las lámparas del automóvil

Consejos de Bosch: Para más luz, más visibilidad, más seguridad

- Compruebe regularmente el sistema de alumbrado de su vehículo y limpie frecuentemente los cristales de los faros. Unos cristales ligeramente sucios reducen considerablemente el rendimiento lumínico de los faros y las luces.
- Las lámparas producen temperaturas sumamente altas en los faros durante el servicio. Incluso los más pequeños restos de grasa se queman y se quedan de forma permanente en el émbolo, reduciendo la vida útil y probablemente también el rendimiento luminoso. Por este motivo, no sujete nunca las lámparas de los faros por el émbolo de vidrio.
- Todos los nuevos sistemas de faros están equipados con cristales dispersores de plástico. Estos cristales dispersores de plástico se vuelven amarillentos por la acción de los rayos ultravioleta. Al comprar nuevas lámparas de faros cerciórese, por tanto, de que sean lámparas con UV cut.
- En la oferta de Bosch encontrará diferentes líneas de productos para distintos usos previstos. Cuando reequipe su vehículo, es decir que cambia la línea de productos, debe cambiar siempre ambas lámparas.
- Desconectar siempre las luces y el encendido: Así se evitan daños en el sistema eléctrico/electrónico del vehículo.
- Debe trabajar con cuidado: Evite los tirones fuertes. Podrían producirse daños en el enchufe y en el soporte.
- No sujete nunca el vidrio con los dedos: Debido a la mezcla del sudor de las manos y la lámpara, existe el riesgo de que ésta explote. Por tanto, las lámparas sólo deben sujetarse con los dedos por el zócalo.
- Comprobación de lámparas: Los expertos recomiendan comprobar después de cada cambio de lámpara también el ajuste de los faros al realizar el control de la función.

Símbolos para más seguridad

En nuestros envases encontrará diferentes símbolos que le ofrecen indicaciones para la manipulación de las lámparas.

No toque el vidrio con los dedos.
Sostenga la lámpara por el zócalo.

Proteger contra salpicaduras de agua.

Antes de sustituir la lámpara, apague los faros del vehículo.

No utilizar lámparas con ampollas de vidrio rayadas o dañadas.

Lleve puesta una protección adecuada para los ojos al montar y desmontar los componentes.

Uso previsto de la lámpara:
Se trata de un lámpara para vehículos
(6 V, 12 V).

Lleve puestos guantes adecuados al montar y desmontar los componentes.

Uso previsto de la lámpara:
Se trata de un lámpara para vehículos
(24 V).

Cuidado: Caliente.

La lámpara no es adecuada para la iluminación de estancias en el hogar.

Funcionamiento sólo en luz
con cubierta de protección.

Montaje sólo por personal especializado.

Concepto estrella: Identifique fácilmente la característica principal de cada lámpara
