This diagram shows the exploded perspective view of the assembly. At the top is a hammer with a rectangular head and a cylindrical handle. Below it is a long, thin vertical rod labeled U02. At the bottom of the rod is a small circular component labeled K03. Below K03 is a cylindrical component labeled Z02. At the very bottom is a thick, dark circular base labeled Z01, which is shown resting on a hatched surface representing the ground.

This diagram illustrates the assembly of a mechanical device, showing the relationship between various components. The components are labeled with codes in circles:

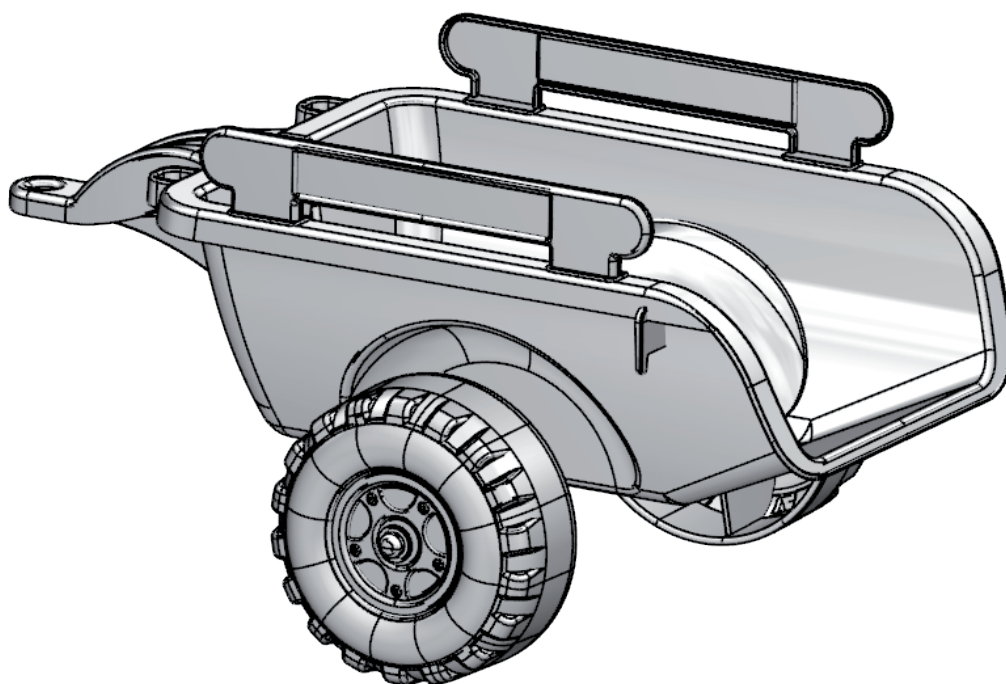

- Z02**: A small cylindrical pin or bush.
- K03**: A small cylindrical component, possibly a bush or spacer.
- M03**: A thin, flat disc or washer.
- L05**: A large, flanged cylindrical component with a ribbed top surface.
- E40**: A vertical shaft or rod.
- N01**: A large, rectangular housing or frame with a handle on the left side.
- U02 + K03**: A small cylindrical component, possibly a bush or spacer.
- Z01**: A small cylindrical component, possibly a bush or spacer.

The diagram shows the assembly process from the bottom up. The base component is **Z01**, which is mounted on a hatched surface. Above it is **U02 + K03**, followed by **Z02**. The next component is **M03**, which is a thin disc. Above this is **L05**, a large flanged cylinder. The shaft **E40** passes through the center of **L05** and extends upwards. The top of the shaft **E40** is shown passing through the housing **N01**. The handle on the left side of the housing is labeled **N01**. The diagram also shows a separate view of the top of the housing **N01** with a handle, which is labeled **E40** and **L05**.
